Chicago, IL • (872) 261-1348 • [kalkidan.bekalu@yahoo.com](mailto:kalkidan.bekalu@yahoo.com)  
[linkedin.com/in/kalkidanaleme](https://linkedin.com/in/kalkidanaleme) • [github.com/kalubekalu](https://github.com/kalubekalu)

## PROFESSIONAL SUMMARY

---

Full-Stack Software Engineer with 6+ years building and shipping production web applications across healthcare, enterprise, and startup environments. Strong across React/TypeScript frontends and Node.js/Python backends, with hands-on ownership of CI/CD pipelines, Docker, and AWS infrastructure. Currently building a health-technology platform end to end — architecture, delivery, and deployment. Works autonomously in fast-moving teams and integrates AI-assisted development responsibly into day-to-day engineering.

## TECHNICAL SKILLS

---

**Languages:** JavaScript, TypeScript, Python

**Frontend:** React (18/19), Next.js, Vue.js, Vite, TanStack Query, Jotai, Tailwind CSS, Material-UI (MUI), Styled-components, React Hook Form, Zod, i18next

**Backend:** Node.js, Express, Fastify, Python, FastAPI, REST APIs, GraphQL, SQLAlchemy, Pydantic

**Databases:** PostgreSQL, MongoDB, Redis, Firestore, Neon Serverless Postgres

**Cloud & DevOps:** AWS (ECS, Fargate, ECR, S3, EC2, Lambda), GCP (Cloud Run, Firestore, BigQuery), Docker, Docker Compose, Kubernetes, Terraform, Nix, GitHub Actions, CI/CD

**Auth, Analytics & Messaging:** Clerk, PostHog, CloudWatch, Twilio (IVR/messaging), Esper (MDM/Kiosk)

**Testing:** Playwright (E2E), Vitest (Unit), React Testing Library

**Practices:** Agile/Scrum, TDD, SOLID, Feature-Sliced Architecture, Code Splitting, Lazy Loading, SSR, Accessibility (WCAG), Technical Documentation

**AI-Assisted Development:** Claude Code, Cursor, GPT-4o, Model Context Protocol (MCP)

**Tools:** Git, Jira, Slack, Notion, Figma

## PROFESSIONAL EXPERIENCE

---

### SMYL Fitness Rx — Software Engineer II

*Health-Technology Startup | Remote | Mar 2025 – Present*

- Build and ship features end to end on a health-technology platform using React 19, TypeScript, and Vite, with TanStack Query and Jotai for state and Material-UI, React Hook Form, and Zod for accessible, validated interfaces.
- Own GitHub Actions CI/CD pipelines covering automated testing, Docker builds, and AWS ECS/Fargate deployments; migrated build runners to Blacksmith for faster pipelines.
- Deploy and operate services on AWS (ECS, ECR, S3, EC2), containerized with Docker and made reproducible with Nix.
- Integrated Clerk for authentication and session management and PostHog for product analytics and funnel tracking to drive data-informed iteration.
- Implemented Mobile Device Management (MDM) with Esper for remote tablet control and kiosk-mode enforcement, and Twilio Interactive Voice Response (IVR) to automate customer communication.
- Established a testing strategy across Playwright (end-to-end), Vitest (unit), and React Testing Library; enforced code quality with Biome and Husky pre-commit hooks.
- Designed feature-sliced architecture and applied SOLID principles for modularity and maintainability; integrated AI-assisted development (Claude Code, Cursor) with a disciplined view of where it accelerates output versus where human judgment is required.

### Kimberly-Clark — Full-Stack Engineer

*Remote | Nov 2022 – Feb 2025*

- Built enterprise web applications serving 2,000+ internal users with React, Next.js, TypeScript, and Node.js in agile, cross-functional teams.
- Implemented server-side solutions with Node.js and GraphQL, reducing API response times by roughly 30%.
- Built reusable UI component libraries and drove frontend architecture standards across teams.
- Improved performance through code splitting, lazy loading, and state-management refinements; contributed to CI/CD pipelines and automated test coverage.
- Led a documentation initiative that cut new-developer onboarding time by roughly 40%, while maintaining a 90%+ sprint completion rate.

## **XTIVIA, Inc. — Full-Stack Engineer**

*Remote | Feb 2020 – Oct 2022*

- Delivered full-stack features for enterprise and healthcare clients across React and Vue.js frontends and Node.js/Express backends.
- Built real-time dashboards and patient-tracking tools with direct input from healthcare providers.
- Architected microservices and deployed on AWS, reducing infrastructure costs by roughly 40%.
- Modernized legacy systems through React migration and built accessible interfaces following WCAG guidelines.

## **PROJECTS**

---

**Ronen Notes** — AI-assisted note-management app built with React, TypeScript, and Fly.io; a hands-on testbed for agentic AI development workflows using Cursor and Claude Code.

## **EDUCATION**

---

### **B.Sc. in Computer Science & Engineering**

Adama Science and Technology University | Sep 2016 – Jan 2021

## **CERTIFICATIONS**

---

AWS Certified Developer – Associate (2023)
